Western Millcraft Inc. must ensure that a workers skin is protected from harmful substances that may injure the skin on contact or may adversely affect a workers’ health if it is absorbed through the skin.

RESPIRATORY PROTECTIVE EQUIPMENT:

Western Millcraft Inc. must determine the degree of danger to workers at a work site and whether the workers need to wear respiratory protective equipment to protect them if they are or may be exposed to and airborne contaminant.

In making a determination under subsection (1), Western Millcraft Inc. must consider:

- The nature and exposure circumstances of any contaminants
- The concentration or likely concentration of airborne contaminants
- Duration of the exposure
- Toxicity of the contaminants
- Concentration of oxygen
- The warning properties of the contaminants
- The need for emergency escape

Based on a determination under subsection (1), Western Millcraft Inc. must:

- Subject to subsection 3(b) provide and ensure the availability of the appropriate respiratory protective equipment to the workers at the work site

Workers must cooperate with Western Millcraft Inc. and must use the appropriate respiratory equipment provided under subsection (3).

CODE OF PRACTICE:

If respiratory protective equipment is used at a work site, Western Millcraft Inc. must prepare a code of practice governing the training, selection, maintenance, and use of respiratory protective equipment.

	WESTERN MILLCRAFT INC. 12506 – 128 STREET EDMONTON, AB, T5L 1C8	Effective Date: 1 OCTOBER, 2011	Revised by: JFK HSE: 3.9: 5.14: 6.1: 8.14 Revision: 00
	OCCUPATIONAL HEALTH & SAFETY MANUAL COMPANY RULES AND REGULATIONS PERSONAL PROTECTIVE EQUIPMENT (PPE)	Page 3 of 3	

Western Millcraft Inc. must ensure that respiratory protective equipment required and selected at the work site is approved by:

- NIOSH
- Another standard
- CSA Standard Z94.4-02 Selection, Use, and Care of Respirators

STORAGE AND USE:

Western Millcraft Inc. must ensure:

- That the respiratory protective equipment is readily accessible
- That the respiratory protective equipment is stored in a manner that prevents its contamination
- That the respiratory protective equipment is maintained in a clean and sanitary condition
- That the respiratory protective equipment is inspected before and after each use to ensure it is in satisfactory working condition
- That the respiratory protective equipment is serviced and used in accordance with the manufacturers specifications

QUALITY OF BREATHING AIR:

Western Millcraft Inc. must ensure that air used in a self-contained breathing apparatus or airline respirator:

- Is of a quality that meets the requirements of Table 1 of CSA Standard Z180.1-00 (R2005) Compressed Breathing Air and Systems
- Does not contain a substance in a concentration that exceeds 10 percent of its occupational exposure limit

EFFECTIVE FACIAL SEAL:

Western Millcraft Inc. must ensure that:

- Respiratory protective equipment depends on an effective facial seal for safe use and must be correctly fit tested
- This test must be done in accordance with CSA Standard Z94.4-02 Selection, Use, and Care of Respirators
- Workers using respiratory protective equipment must be clean shaven where the face piece of the equipment seals to the skin of the face
